

Movie Recommendation System

1. Overview
2. Dataset and Data processing
3. Neural Networks
4. What can it do

https://github.com/YHfeather/Movie_Recommendation_System

Overview

Tools

Python 3.5

TensorFlow 1.7.0

Dataset

movielens

6,040 users
3,900 movies
1,000,209 ratings

users.dat

UserID, Age, Occupation, Zip-code..

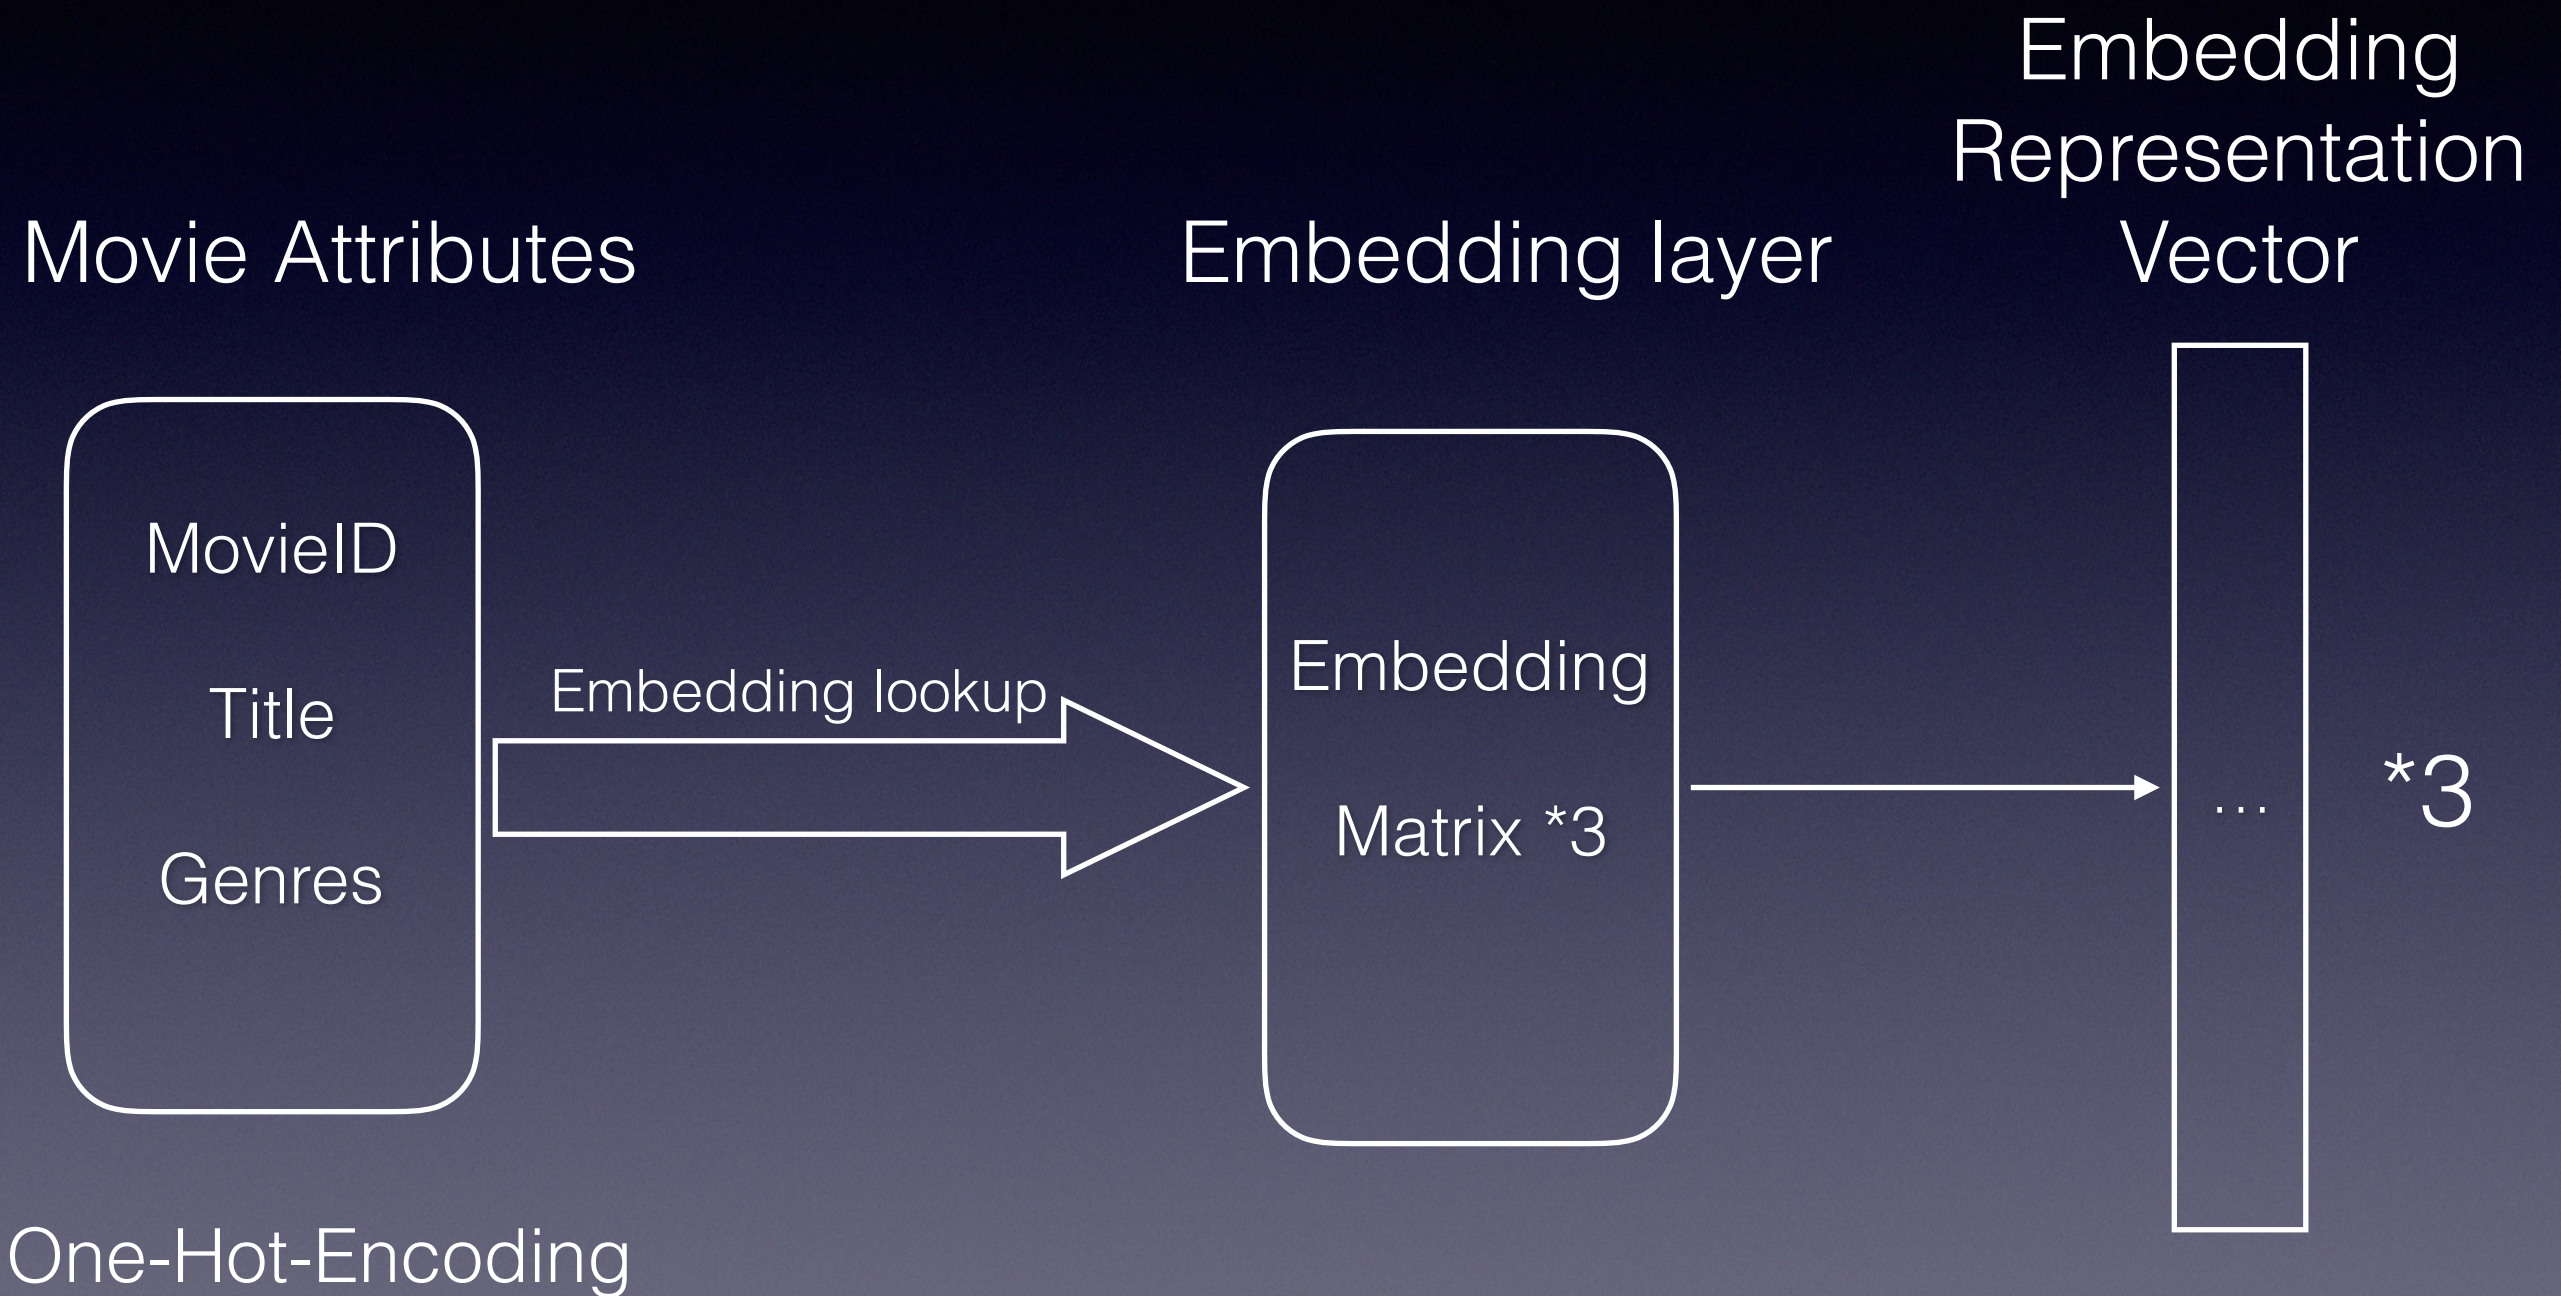

movies.dat

MovieID, Title, Genres

ratings.dat

UserID, MovieID, Ratings (1 ~ 5)

Movie Feature Processing

User Feature Processing

Neural Networks

Movie Feature
Representation

NN for movie

Id Embedding Vector
